ITE 2722: Web Programming - Practical Exam

Time Allowed: 90 minutes **September 2021**

Write a web program to generate the internet usage summary according to the customer inputs, as shown in Figure 1. When the user clicks the Calculate button, you should display the usage summary, as shown in Figure 2.

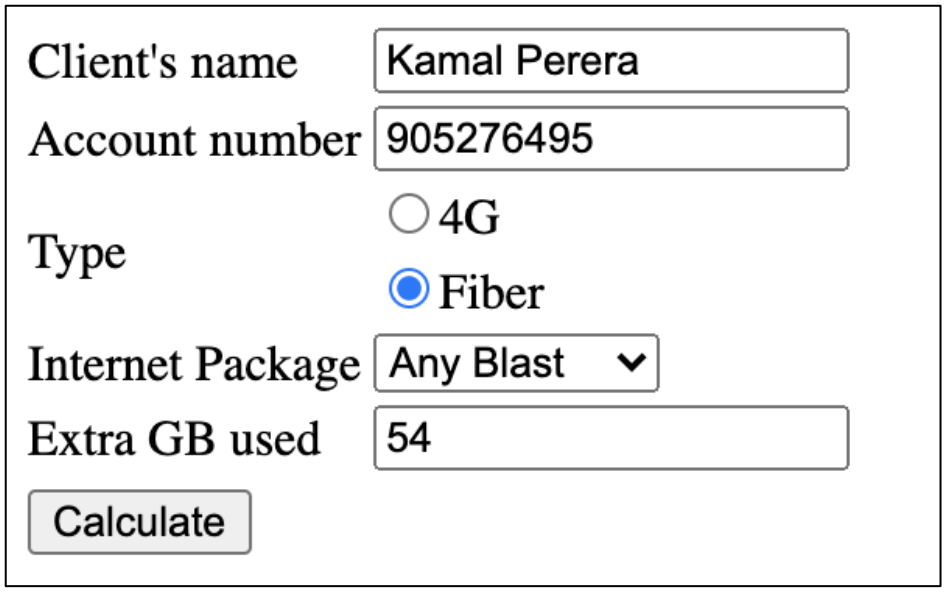

Figure 1

Internet Usage Bill of Account Number 905276495

Customer Name : Kamal Perera
Internet Package : Any Blast

	Units	Amount
Rental : Fiber		Rs. 760
Monthly Rental		Rs. 2340
Extra GB used	54	Rs. 4225
Total		**Rs. 7325**

Figure 2

The bill is calculated as follows

Internet Package	Monthly Rental
Basic	Rs. 760
Web Lite	Rs. 1520
Any Blast	Rs. 2340
Family Plan	Rs. 3790

Extra GB charges are as follows

Data	Charges per GB
1 GB to 4 GB	Rs. 100
5 GB to 19 GB	Rs. 85
20 GB to 49 GB	Rs. 75
50 GB upwards	Rs. 60

Eg- Calculation for 54 extra GB

(4 * 100) + (15 * 85) + (30 * 75) + (5 * 60) = 4225

- For fiber connections, a rental of Rs. 760 is charged.

Your Web program should be written using PHP language and deployed on the given PHP enabled webserver. Create a new folder in the C:/Xampp/htdocs folder and rename it as per your UOM registration number (ex. E19XXXXX).
